                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      86
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              USA
                                       polynucleotide kinase. Adaptor oligonucleotides were ligated to the blunt ends in high molar excess. The adaptored DNA was purified and size-selected for a 9.5 to 10.5 kb range using preparative agarose gel electrophoresis. Vector DNA was prepared from a derivative of pWD42 (gi|4732114|gb|AF129072.1), a copy-number inducible derivative of plasmid R1. The vector was ligated
                                                                                                                                                                                             (http://www.jax.org/resources/documents/dnares/). The DNA was hydrodynamically sheared by repeated passage through a 0.005 inch orifice at constant velocity. The sheared DNA was blunt end-repaired with T4 DNA polymerase and T4
                                                                                                                                                                                                                                                                                        musculus C57BL/6J (male) was obtained from the Jackson Laboratory Mouse DNA Resource
  purified.
                    with adaptors complementary to the insert adaptors and
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        FLC I"

۳,

Pred. No. is the number of results predicted by chance to have a

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Chen,G., Chen,R., Chen,2.,                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Delaney, K.R., Delgado, O., Denn, A.L., Ding, Y.,                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Bouck, J., Bowie, S., Brieva, M., Brown, E., Brown, M., Bryan Buhay, C., Burch, P., Burkett, C., Burrell, K.L.,                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Bryant, N.P.,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Allen,C.,

NOTE: This is a 'working draft' sequence. It currently consists of 51 contigs. The true order of the pieces is not known and their order in this sequence record is arbitrary. Gaps between the contigs are represented as runs of N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence as soon as it is available and the accession number will
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              as soon as it
be preserved.

Consensus quality: 96506 bases at least Q20

* NOTE: Estimated insert size may differ from sequence length
(see http://www.hgsc.bcm.tmc.edu/docs/Genbank_draft_data.html).

* NOTE: This is a 'working draft' sequence. It currently
consists of 49 contigs. The true order of the pieces
is not known and their order in this sequence record is
arbitrary. Gaps between the contigs are represented as
runs of N. but the exact sizes of the gaps are unknown.
This record will be updated with the finished sequence
as soon as it is available and the accession number will
```

Where differences are found these are annotated as variations together with a note of the overlapping clone name. Note that the variation annotation may not be found in the sequence submission corresponding to the overlapping clone, as we submit sequences with only a small overlap as described above.

Gaps between the contigs are represented as runs of N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence as soon as it is available and the accession number will be preserved.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        NOTE: This is a 'working draft' sequence. It currently consists of 21 contigs. The true order of the pieces is not known and their order in this sequence record is
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              34971 35070: gap of 100 bp

XX C Castellot JJ 23-SEP-1999 W09947556-A2 Rattus sp. Heparin-induced CCN-like protein; HICP; cell-associated activity; ss; cardiovascular disorder; aberrant cell proliferation; fibrotic disorder. Rat HICP polypeptide encoding cDNA 26-NOV-1999 AAZ07516; AAZ07516 standard; (TUFT ) TUFTS 18-MAR-1999; 19-MAR-1998; (first entry) COLLEGE. 98US-0044273 99WO-US05999 cDNA; 1708 ВP

a

Nucleic acid sequences encoding rat heparin-induced CCN-like protein, used in methods to identify modulators or in diagnostic applications

WPI; 1999-562060/47. P-PSDB; AAY27434.

Agents that stimulate or inhibit HICP protein activity or expression, antisense HICP nucleic acid molecules and HICP antibodies, can be used to modulate cell-associated activity. HICP modulators can be used to treat disorders characterized by aberrant HICP protein activity or expression. Probes capable of hybridizing to HICP mRNA or antibodies specific for HICP can be used to detect HICP activity in a biological sample. HICP can be used to treat disorders, such as a cardiovascular or fibrotic that the protein activity is a cardiovascular or such as a cardiovascular o

Agents that stimulate or inhibit HICP protein activity or expression, antisense HICP nucleic acid molecules and HICP antibodies; can be used to modulate cell-associated activity. HICP modulators can be used to treat disorders characterized by abberrant HICP protein activity or expression. Probes capable of hybridizing to HICP mank or antibodies specific for HICP can be used to detect HICP activity in a biological sample. HICP can be used to treat disorders, such as a cardiovascular or fibrotic disorder, characterized by abberrant cell proliferation. The present sequence represents the coding sequence of rat HICP.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Heparin-induced CCN-like protein; cardiovascular disorder; aberrant

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          The invention provides a rat heparin-induced CCN-like protein (HICP) protein. Agents that stimulate or inhibit HICP protein activity or expression, antisense HICP nucleic acid molecules and HICP antibodies, can be used to modulate cell-associated activity. HICP modulators can be used to treat disorders characterized by aberrant HICP protein activity or expression. Probes capable of hybridizing to HICP mRNA or antibodies specific for HICP can be used to detect HICP activity in a biological sample. HICP can be used to treat disorders, such as a cardiovascular or fibrotic disorder, characterized by aberrant cell proliferation. The present sequence represents the coding sequence of rat HICP mature polypeptide.

                                                                                                                                                                                                                                                                                                                                                                                                                                The invention provides a rat heparin-induced CCN-like protein (HICP) protein. Agents that stimulate or inhibit HICP protein activity or expression, antisense HICP nucleic acid molecules and HICP antibodies, can be used to modulate cell-associated activity. HICP modulators can be used to treat disorders characterized by aberrant HICP protein activity or expression. Probes capable of hybridizing to HICP mRNA or antibodies specific for HICP can be used to detect HICP activity in a biological sample. HICP can be used to treat disorders, such as a cardiovascular or fibrotic disorder, characterized by aberrant cell proliferation. The present sequence represents a nucleotide sequence encoding the insulin-like growth factor binding protein (IGFBP) domain of HICP polypeptide.
                                                                                                                                                                                                                                                                                                                                                                                                     Sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Disclosure; Page 104; 108pp;

Agents that stimulate or inhibit HICP protein activity or expression, antisense HICP nucleic acid molecules and HICP antibodies, can be used to modulate cell-associated activity. HICP modulators can be used to treat disorders characterized by aberrant HICP protein activity or expression. Probes capable of hybridizing to HICP mRNA or antibodies specific for HICP can be used to detect HICP activity in a biological sample. HICP can be used to treat disorders, such as a cardiovascular or fibrotic disorder, characterized by aberrant cell proliferation. The present sequence represents a cDNA encoding the Yon Willebrand C (VWC) a domain of the HICP polypeptide.

                                                                                           Q
                                                                                                                                                                                                                              The present invention describes Wnt-1 induced secreted polypeptides, CC WISP-1, 2 and 3. The novel WISP polypeptides, designated WISP-1, WISP-2 cC and WISP-3 have homology to connective tissue growth factor (CTGF). CC Products from the present invention can be used to treat WISP-related CC disorders such as breast, ovarian, and colon cancer or melanoma. The CC products can be used to treat arteriosclerosis. The products can also be used to treat other diseases e.g. benign and malignant tumours, CC leukaemia and lymphoid malignancies, neuronal, glial, astrocytal, hypothalamic and other glandular, macrophagal, epithelial, stromal, and CC blastocoelic disorders, haematopoiesis-related disorders, kidney CC disorders, skin disorders, desmoplasia, fibrotic lesions, kidney CC disorders, bone-related disorders such as osteoporosis, trauma such as CC burns, incisions, and other wounds, connective tissue disorders, catabolic states, testicular-related disorders, and inflammatory, CC angiogenic and immunologic disorders including arteriosclerosis. The CC products can also be used for detection and diagnosis especially of CC individuals with neoplastic cell growth or proliferation. The products can be used in the production of transgenic or knock-out animals.

CC Antibodies can be used to induce death in WISP-1, 2 or 3 overexpressing

                                                                                                             Q
                                                                                                                                                                                                                                                                                          The present invention describes Wnt-1 induced secreted polypeptides, CC WISP-1, 2 and 3. The novel WISP polypeptides, designated WISP-1, WISP-2 and WISP-3 have homology to connective tissue growth factor (CTGF). CC and WISP-3 have homology to connective tissue growth factor (CTGF). CC Products from the present invention can be used to treat WISP-related CI disorders such as breast, ovarian, and colon cancer or melanoma. The CI color to treat other diseases e.g. benign and malignant tumours, color to treat other diseases e.g. benign and malignant tumours, color to treat diseases e.g. benign and malignant tumours, color to treat other diseases e.g. benign and malignant tumours, color to the products can also be lastocoelic disorders, had an analysis and other glandular, macrophagal, epithelial, stromal, and color blastocoelic disorders, hadmatopoissis-related disorders, kidney colored disorders, skin disorders, adematopoissis-related disorders, kidney colored with the color treated disorders, and inflammatory, colored with most of the colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored colored color
                                                                                                                                                         Query Match

                                                                                                                                                                                                                                              CC Products from the present invention can be used to treat WISP-related CC disorders such as breast, ovarian, and colon cancer or melanoma. The CC products can be used to treat other diseases e.g. benign and malignant tumours, CC leukaemia and lymphoid malignancies, neuronal, glial, astrocytal, hypothalamic and other glandular, macrophagal, epithelial, stromal, and Collastocoelic disorders, haematopoiesis-related disorders, kidney CC disorders, skin disorders, desmoplasia, fibrotic lesions, kidney CC disorders, bone-related disorders such as osteoporosis, trauma such as CC burns, incisions, and other wounds, connective tissue disorders, catabolic states, testicular-related disorders, and inflammatory, CC angiogenic and immunologic disorders including arteriosclerosis. The CC products can also be used for detection and diagnosis especially of CC individuals with neoplastic cell growth or proliferation. The products can be used in the production of transgenic or knock-out animals.

CC anlibodies can be used to induce death in WISP-1, 2 or 3 overexpressing
                                                                                           Query Match

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           The present invention describes Wnt-1 induced secreted polypeptides, WISP-1, 2 and 3. The novel WISP polypeptides, designated WISP-1, WIS and WISP-3 have homology to connective tissue growth factor (CTGF).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Homo
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       AAX76501 standard; DNA; 738

                                                                                                                                                                                                                                                                                                                                                                     The present invention describes Wnt-1 induced Secreted polypeptides, CC WISP-1, 2 and 3. The novel WISP polypeptides, designated WISP-2, WISP-2 CC and WISP-3 have homology to connective tissue growth factor (CTGF). CC Products from the present invention can be used to treat WISP-related CC disorders such as breast, ovarian, and colon cancer or melanoma. The CC products can be used to treat arteriosclerosis, The products can also be used to treat other diseases e.g. benign and manignant tumours, CC leukaemia and lymphoid malignancies, neuronal, glial, astrocytal, and blastocoelic disorders, haematopoiesis-related disorders, kidney CC disorders, skin disorders, desmoplasia, fibrotic lesions, kidney CC disorders, bone-related disorders, truma such as the bolic states, testicular-related disorders, and inflammatory, CC catabolic states, testicular-related disorders
                                                                                                                                   Query Match

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       EBAF-2; 10112-
EBAF-8 homologue;
                                                                                                                                                                   This sequence encodes the EGF-like homologue PRO261.
The invention relates to antibodies (Ab) that bind to any of the polypeptides (I) designated PRO187; PRO533; PRO214; PRO240; PRO211; PRO230; PRO261; PRO246 or EBAF-2. The Ab, or other agents that inhibit expression and/or activity of (I) are used: (i) to inhibit growth of tumours; and (ii) as diagnostic/prognostic reagents for detection or quantification of (I) in cells or tissues, by standard immunoassays, wi overexpression being indicative of cancer. For therapeutic use, the Ab may be conjugated to a toxin, chemotherapeutic agent or radioisotope. Genes expressing (I), many of which are growth factor homologues, are overexpressed in some cases of cancer.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         25-NOV-1997;

                                                                                                                                                                                                                                                                                                                                                                                      This sequence represents a human PRO261 nucleotide sequence. PRO261 is a CC growth factor. The invention relates to isolated antibodies which bind to CC a polypeptide. The "PRO" polypeptides are encoded by genes which are over CC expressed in the genome of tumour cells. Vectors and host cells CC comprising the nucleic acid encoding the antibodies are used in the CC production of the antibodies. The antibodies and nucleic acids encoding them are used for diagnosing a tumour in a mammal. The antibodies are CC used for inhibiting the growth of tumour cells and identifying compounds CC that inhibit a biological or immunological activity of and/or expression CC of a pRO187, pRO533, pRO214, pRO240, pRO211, pRO246 or CC mediated prodrug therapy (ADEPT) by conjugating the antibody to a CC mediated prodrug therapy (ADEPT) by conjugating the antibody to a CC drug. The antibodies can be fluorescently labelled and monitored by light conscripts, flow cytometry or fluorimetry for diagnosis and prognosis of temporare.
                                                                                                                                                                                                                                                                                    Best Loc

P-PSDB; 2001-408281/43. DB; AAU12331.

Isolated, secretory and transmembrane PRO polypeptide used to detect other PRO polypeptides, link bioactive molecules to cells expressing PRO polypeptides, and detect the presence of mammalian tumours e.g. breast, prostate, cervical

Claim 3; Fig 319; 813pp; English.

PRO polypeptides, and to detect the presence of mammalian lung, colon, breast, prostate, rectal, cervical or liver tumours by comparing PRO polypeptide expression in a cell sample to that in a control sample. Some of the 275 sequences are also useful to stimulate the release of tumour necrosis factor-alpha (TNF-alpha) from human blood, the proliferation or differentiation of chondrocytes, the proliferation or gene expression in pericyte cells, the release of proteoglycans from cartilage, the proliferation of inner ear utricular supporting cells or of T-lymphocytes, the release of a cytokine from peripheral blood monocytes (PBMCS), or the proliferation of endothelial cells. Some of the PRO polypeptides may modulate glucose or free fatty acid uptake by skeletal muscle cells or by adipocytes; or inhibit binding of A-peptide to factor VIIA. The PRO polypeptides can be used in assays to identify AAS21244-AAS21518 encode for novel human secretory and transmembrane PRO polypeptides. The PRO polypeptides are useful to detect other PRO polypeptides, to link bioactive molecules to cells expressing PRO polypeptides, to modulate biological activities of cells expressing interactions.

                                                                                                                                 It was found that the pRO genes are amplified in the genome of tumour cells. The gene amplification is expected to be associated with the overexpression of the gene product and contributes to tumourigenesis. Therefore, antagonists of PRO proteins are useful for the treatment of benders such as neuronal, gilal, astrocytal, hypothalamic, glandular epithelial, inflammatory and immunologic discrete.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    26-JUL-1999;

```

The invention relates to novel human angiogenesis-associated protein designated PRO proteins (AAB33064-B53097), and to nucleic acids ence PRO proteins. The invention also relates to vectors and host cells comprising a PRO nucleic acid, the recombinant production of a PRO protein, PRO antibodies specific for a PRO protein, fusion protein compounds which inhibit the expression of a PRO gene. The invention additionally encompasses methods of identifying modulators of PRO expression or activity; diagnosing a cardiovascular, endothelial or angiogenic disorder, or a susceptibility to such a disorder by detec mutations in a PRO gene, or the expression level of a PRO gene within

detecting within a

```
disorder via the administration of a PRO protein, PRO nucleic acid, or PRO agonist or antagonist; a retroviral gene therapy vector comprising a PRO agonist or antagonist; a retroviral gene therapy vector comprising a PRO agonist caid; and methods of inhibiting or stimulating endothelial cell growth, cardiac hypertrophy or PRO-induced analogenesis via the administration of a PRO protein, or an agonist or antagonist thereof. PRO nucleic acids, PRO proteins, antibodies against PRO proteins, PRO agonists and PRO antagonists may be used as therapeutic agents to treat cardiovascular, endothelial or angiogenic disorders, such as therapeutic spents to treat cardiovascular, endothelial or angiogenic disorders, such as therapeutic spents to treat cardiovascular, or an agonist and a section and properties, wounds, cancer, Alzhelmer's disease, Huntington's disease, or stroke. PRO nucleic acids are additionally useful in the recombinant production of PRO proteins, as hybridisation probes to screen libraries to isolate colls with sequence identity to PRO proteins, to map genes encoding PRO proteins, to analyse genetic disorders, and in gene therapy. PRO nucleic acids can also be used to produce transgenic animals useful for the development and screening of potential
                                                                                                                                                                                                                                                                                                                                                                                                                                                                       ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Human; PRO; promotion; inhibition; angiogenesis; cardiovascularisation;

inappropriate PRO expression such as cardiovascular, endotherial or anglogenic disorders in mammals (e.g. atherosclerosis, cancers and cardiac hypertrophy). For example, the nucleic acids (NCs) and vectors containing them and the PRO polypeptide may be used to treat disorders associated with decreased PRO expression. AAA77510 to AAA77721 and AAB24438 to AAB24435 represent nucleotide and protein sequences used in the exemplification of the present invention.
                                                        Goddard A;
                                                                                                                                                                                                                                                                                                                         The present invention describes nucleic acids encoding PRO polypeptides
                                                                                                                                                                                                                                                                                                                                        useful for preventing, diagnosing and treating diagnosing a cardiovascular, endothelial or angiogenic disorder in mammals by modulating cell proliferation, angiogenesis and cardiovascularisation, and for identifying agonists and antagonists of these processes. The nucleic acids and the proteins they encode may be used in the prevention, treatment and diagnosis of diseases associated with
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Gaps
                                                                                                                                                                                                 Nucleic acids encoding PRO polypeptides useful for preventing, diagnosing and treating diagnosing a cardiovascular, endothelial or angiogenic disorders in mammals -
